Re: BRCC Ice Making Plant

RECEIVED

JUN 02 2021

Concerning funding for the replacement of the Evaporative Condenser, an essential component of the BRCC ice making plant.

Costs as per attached quotes.

Funding sources:

- An award from the Recreational Facilities Development grant program, under the NS department of Community, Culture and Heritage department in the amount of \$15,725.00. payable to BRCC, when proof of progress on the project is provided.
- An amount of \$5000.00 from the BRCC.
- Balance from Municipality of Barrington.

It is imperative that this project be given priority, as it must be completed by mid to late September, to allow the curling season to start on schedule, and delivery times have increased due to the pandemic situation.

The MOB Public Works Supervisor may have requested quotes for this replacement already, we have not been advised.

Please contact me for any further information.

To: Cameron Whiteway <cwhiteway@barringtonmunicipality.com>, cushing.bob@gmail.com

Hi Bob and Cameron,

This is the budget price for an evaporative condenser for the curling club updated for 2021.

Note the delivery time is 12 weeks, so we should order asap.

Model VC1-38 EVAPORATIVE CONDENSER

436.00 MBH based on 90.00°F condensing temp. with an entering air wet bulb of 68.00°F.
Refrigerant: R-717.

3 HP fan motor: Totally Enclosed, Fan Cooled (TEFC), 1 Speed/1 Winding - Premium Efficiency
(Inverter Duty)

575 volt, 3 phase, 60 hertz - for remote sump

Net Selling Price Supply Only - \$28,787 CAN + HST - freight allowed to site. Delivery time is approximately 12 weeks to site.

Installation budget is attached – it allows four days, but I think we may be able to cut a day off of that, and we would only bill the actual costs as per the CSA.

The boom truck or fork lift would be extra – we are assuming you have one available to you there.
