

WHO WE ARE

We're on a mission to plant
1 billion trees by 2028.

We're a hi-tech reforestation company with the goal of building scalable & automated systems that use a data-driven, biodiversity-centric approach to rebuild healthy resilient forests at scale.

The world is short of planting targets and unlikely to meet a fraction of the demand without significant changes.

Limited planter
availability

Limited nursery
availability

Limited scalability

Limited cost-sharing
partners

Over the last 3 years, we have developed a proprietary solution that addresses all the scalability issues with planting.

And the best part is that as a for-profit company, we bring in private money to support planting.

Dry pod tech

Automated & modular
production

Rapid planting tech

OUR TECH

Seedpods

Rapid, self-sustaining
seedpod technology

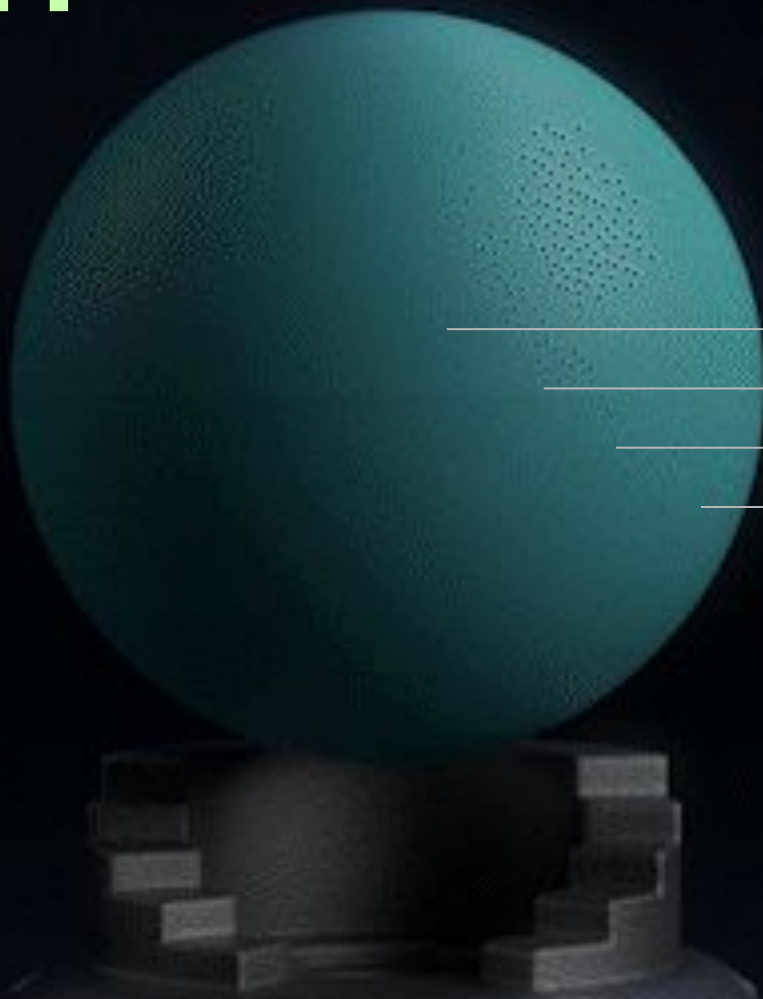

OUR TECH

Pod Production

Efficient at scale.

480K pods produced
per day

1 tree seed

Water retention polymers

Beneficial fungi & bacteria

Minerals & nutrients

Growth medium conditioner

OUR TECH

Deployers

No site prep, no nursery delay. Safe, scalable, automated.

Field Unit Kits

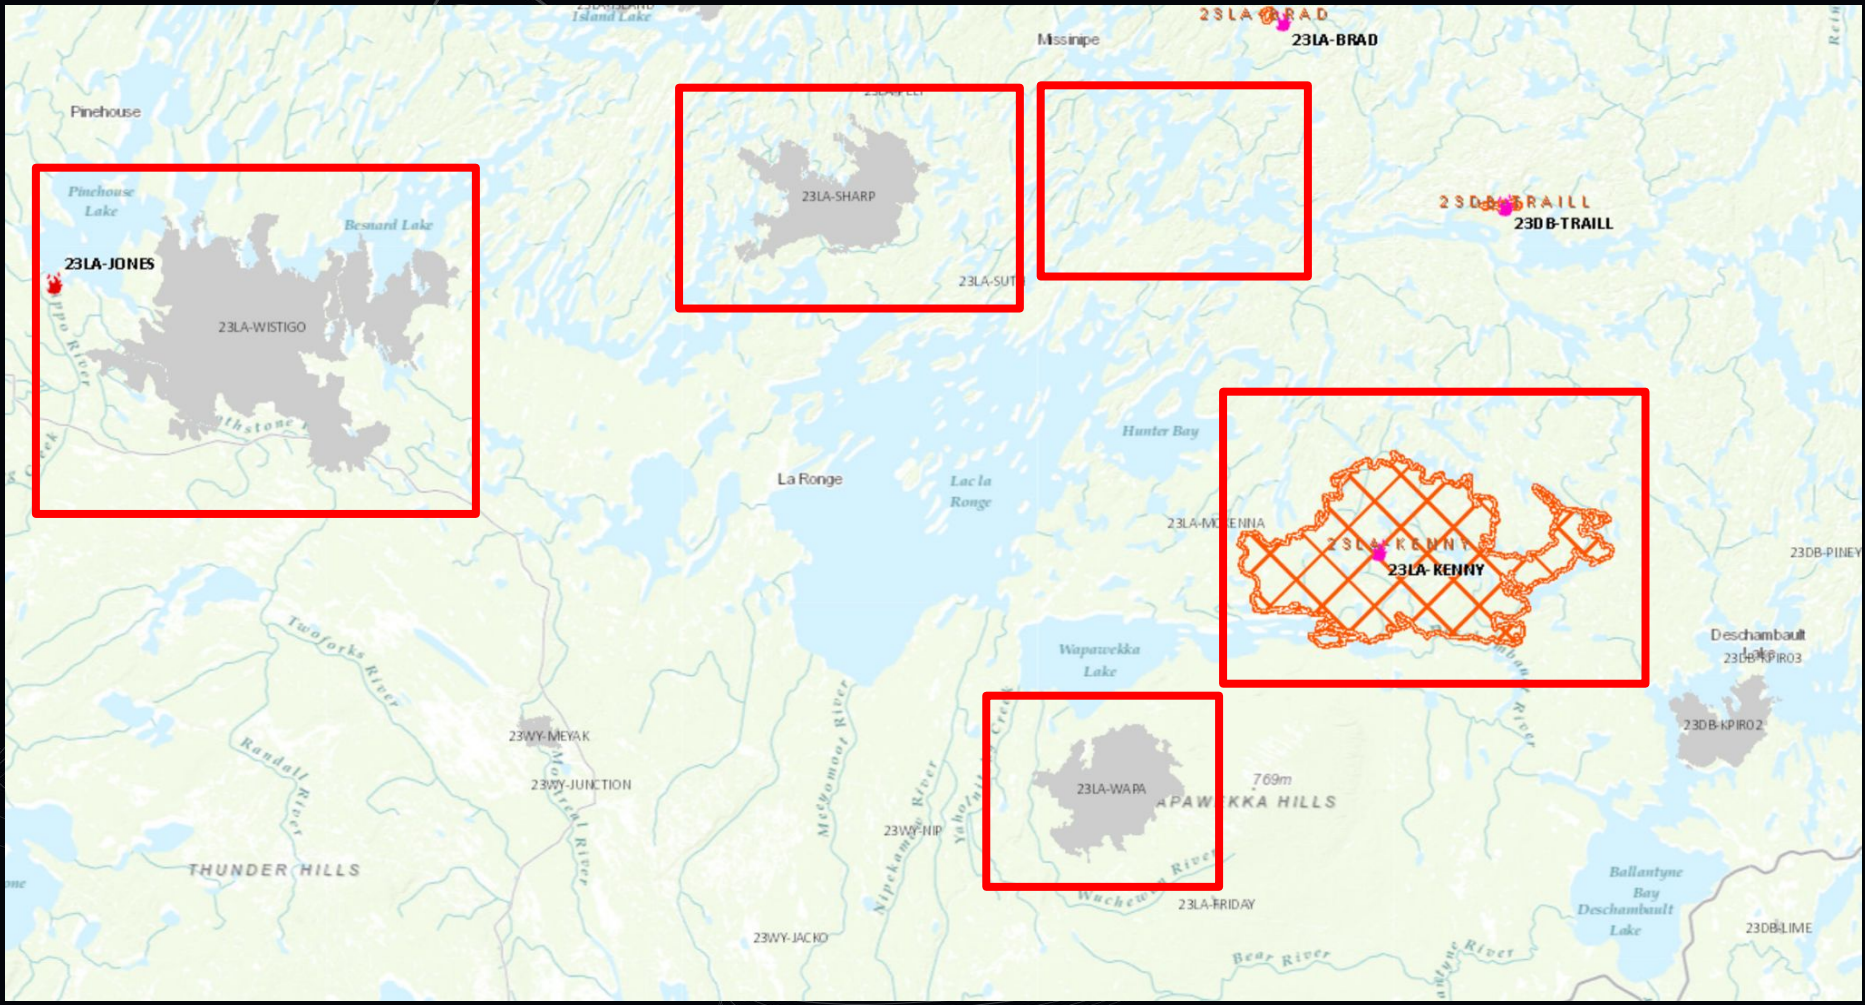

Self-contained deployment to remote areas.
Repeatable, ready to go.

OUR TECH

Precision Microsite Selection

Machine learning algorithms.
Continuously optimized.

COLLABORATION

Flash Forest × Lac La Ronge Indian Band

- 2BT Funding Partnership
- Seed/Cone Collection and Species Consultation
- Biodiversity of planting project – including deciduous species and other bio-culturally significant medicinal herbs and shrubs in the future.
- Site Identification
- Monitoring Capacity
- First Choice on Contractor and Employment Opportunities

Next Steps:

- Community Visit
- Burnt Stand Site Reconnaissance
- Connect with Flash Forest for Cone Collection Collaboration
- Coordinate with Ty Roberts, B.S.A., PAg. – Reserve Lands Manager and 2BT Letter of Support
- Coordinate with Alan Sklapsky – Kitsaki Management Limited Partnership and 2BT Letter of Support

Ottawa, ON K1A 0E4

Subject: Support for Flash Forest's Involvement in the 2 Billion Tree Program

Dear Members of the 2BT Panel,

On behalf of Barrington Municipality (Barrington), I am pleased to confirm our collaborative support for Flash Forest's participation in the 2 Billion Tree Program initiated by the federal government of Canada, specifically the Natural Resource Canada Division.

Located in _____, Barrington, officially named the Municipality of the District of Barrington, is a district municipality in western Shelburne County, Nova Scotia, Canada. Statistics Canada classifies the district municipality as a municipal district.

Flash Forest and Barrington will work together in addressing the reforestation of these wildfire ravaged areas. The use of drone technology and proprietary seed pods brings added value in restoring and enhancing our forest ecosystems, particularly for safety and hard-to-access areas. Flash Forest's commitment to sustainable practices, creating green jobs, and environmental stewardship align perfectly with the objectives of the 2 Billion Tree Program.

As Flash Forest prepares to participate in the 2 Billion Tree Program, Barrington pledges to collaborate closely with them to ensure our success. In order to make this possible, Barrington will work with Flash Forest:

- In identifying planting sites suitable for Flash Forest and Barrington to conduct reforestation activities;
- Permitting and other regulatory requirements;
- Securing local tree species and seed for pod transformation such as spruce, poplar, birch, and tamarack amongst others;
- Potential employment and/or contracting within our community for planting logistics and post-plant monitoring; finally,
- Flash Forest intends to meet with Barrington in Fall 2023 and a community engagement to be discussed

Barrington looks forward to working with Flash Forest in the 2 Billion Tree Program, recognizing the significant impact it will have on reforestation and restoration efforts in Nova Scotia. Together, we can mitigate climate change, enhance biodiversity, and create a sustainable future for our region and beyond.

Should you require any further information or assistance, please do not hesitate to reach out to our team. We are excited about the potential of this partnership and are eager to contribute to the success of the 2 Billion Tree Program.

Thank you for your consideration and for your commitment to environmental restoration.

Sincerely,
