Date of CoW Agenda Item - Sometime in June 2024

To consider the prospect or legitimacy of resurfacing and upgrading the Municipal tennis court on Sherose Island.

(Possible Motion to Consider)

Whereas our Municipal tennis court has not had many upgrades to the court surface nor to the fencing in recent years;

Whereas our Municipal tennis court currently has some dips and uneven spots in its playing surface;

Whereas the fencing around our Municipal tennis court does not provide space for proper regulation play;

Whereas construction is currently taking place, soon to include an asphalt parking lot for our arena and new recreation centre and that, therefore it may be more cost-effective to consider upgrades to our Municipal tennis court at this same time;

Whereas our Municipal tennis court, if upgraded for the aforementioned reasons, could also encompass additional markings to include other court events such as basketball or pickleball;

Therefore, be it duly moved and seconded, that staff look into both the logistics and costs of resurfacing and enlarging the fencing at our current Municipal tennis court to address the need for upgrades and potential for expanding the versatility of this outdoor recreational asset.

Reason: The current outdoor municipal tennis court has not seen upgrades or much maintenance attention in recent years. Our tennis court is a valuable outdoor recreational asset to both residents and visitors and, with some upgrades to the current playing surface and fencing, it could continue to provide a great venue for physical activity and engaging in several popular court sports, including tennis, basketball, ball hockey, and pickleball.
